EDUCATION

Master of Artificial Intelligence

Yeshiva University, Katz School of Science and Health

Aug 2027

New York, NY

Relevant Courses: Data Acquisition and Management, Computational Statistics and Probability, Numerical Methods, Predictive Models, Machine Learning, Artificial Intelligence, Neural Networks and Deep Learning, AI Capstone: R&D Experience.

Bachelor of Technology in Computer Science and Engineering

Vemana Institute of Technology

Jun 2025

India, IN

TECHNICAL SKILLS

Tools and Technologies: Email Management, Automation, Data Entry, Excel, PowerPoint, PDF, Word.

Programming Languages: Python, R

Backend: Python (Flask, Django), REST API development.

Frontend: React.js, HTML/CSS, JavaScript, Component-driven UI

Databases: MySQL, MongoDB

Machine Learning Frameworks: TensorFlow, PyTorch, Scikit-learn, Regression, Classification, Clustering, Neural Networks

Artificial intelligence: Deep Learning, Reinforcement Learning, Natural Language Processing, n8n, RAG, Langchain.

Amazon Web Services: Cloud Architecture, Cost Management, EC2, S3, IAM, VPC, CloudTrail, and ELB

Operations: Docker, Jenkins, Microsoft Azure, Kubernetes.

PROFESSIONAL EXPERIENCE

Data Engineering Intern

Bosch, Bengaluru, India

Feb 2025 - May 2025

India, IN

- Built scalable ETL pipelines processing high-volume IoT sensor data, supporting predictive maintenance for manufacturing equipment.
- Ensured best practices in data governance and security throughout the data engineering lifecycle.

AI Business Intelligence Analyst Intern

Aspire Technology

Oct 2024 - Dec 2024

India, IN

- Developed interactive dashboards and BI reports using Tableau and Power BI to communicate key performance metrics to stakeholders.
- Presented data-driven recommendations to management, demonstrating effective data storytelling.

Research Intern – Smart Agriculture (IoT & AI-based Crop Recommendation)

GKVK (University of Agricultural Sciences)

Oct 2023- Nov 2023

India, IN

- Designed and trained a Random Forest algorithm (Python, Jupyter Notebook, Anaconda), achieving 99% accuracy in crop suitability predictions based on soil nutrient and weather parameters.
- Presented system design and findings at an agricultural innovation workshop, promoting AI-driven smart farming practices.

PROJECTS

Real-Time Crop Recommendation System | IoT, Random Forest, Data Analytics

Oct 2023 - Nov 2023

- Developed a smart farming solution that predicts the most suitable crops for specific plots using soil fertility and weather data, collected via IoT sensors and weather APIs.
- Enabled personalized, data-driven crop recommendations to empower sustainable agricultural decisions for farmers.

Netflix-Clone | Full-stack Web App (Docker, AWS EC2, HTML/CSS, JavaScript)

Jan 2024 - Mar 2024

- Developed a fully functional Netflix-style streaming platform with responsive UI, media search and playback features, containerized it using Docker, and deployed on AWS EC2 for scalable cloud hosting and optimized performance.

Live Ball Tracking System | Computer Vision, Machine Learning, Sensor Fusion

Mar 2024 – Jul 2024

- Integrated sensor data and deep learning algorithms (YOLOv5, OpenCV) to achieve precise object localization, enhancing game analysis and real-time visualization for coaches and broadcasters.

Deep Fake Video Recognition | Deep Learning, Computer Vision, Machine Learning

Nov 2024 - Feb 2025

- Designed an ML model for real-time crop prediction, integrating IoT soil data + live weather APIs.
- Enhanced detection reliability through dataset augmentation and adversarial training, addressing growing digital media risks such as misinformation and identity theft.

CERTIFICATIONS

- Artificial Intelligence Foundation - Infosys SpringBoard
- Machine Learning Foundation – NASSCOM
- System Administrator - ServiceNow University (Course Completed-Exam is Scheduled)
- Application Developer - ServiceNow University (In progress)
